Write about 100 to 150 words in the following topic: **Are tattooed people fully accepted in our present society? Discuss.**

Tattoos are fashionable today and more and more people are getting tattooed. However, I think not all of them are fully accepted in our society.

Many famous people have tattoos on their bodies and they are not only fully accepted but also highly admired by many young people. But most people have to hide their tattoos because they are unaccepted in the place they work at. In my opinion, it is at the workplace where tattoos are least accepted. For example, how would we react if we were operated by a surgeon whose body was full of tattoos? Moreover, news presenters do not have visible tattoos on their bodies, neither do executives, politicians, lawyers, or many other professionals.

To conclude, I sadly believe that nowadays a person wearing a tattoo is still seen by society as a less competent and proficient person.
